# Ne pas suivre l'impression en ligne

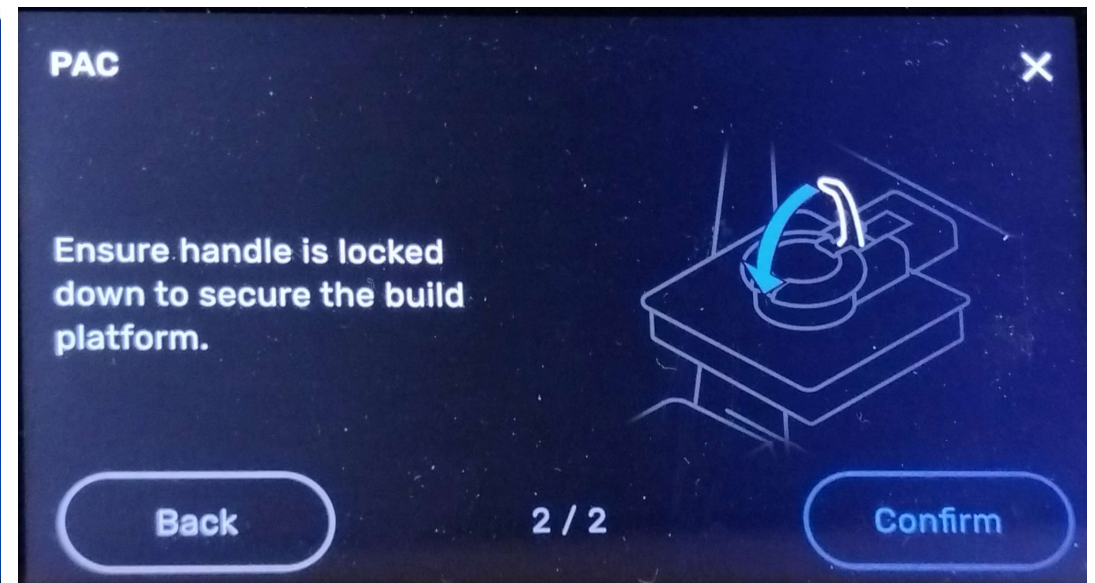

The screenshot displays the PreForm software interface. In the center, a 3D model of a dental arch is shown on a grid. A red arrow points to a notification box that reads: "Tâche chargée avec succès" (Task loaded successfully). Below this, it states: "Votre tâche a été chargée avec succès dans la file d'attente de l'imprimante. Vous pouvez suivre cette impression dans Dashboard pour recevoir des notifications sur son statut." (Your task has been successfully loaded into the printer's queue. You can follow this print in the Dashboard to receive notifications about its status). Two buttons are visible: "Pas maintenant" (Not now) and "Suivre l'impression en ligne" (Follow print online). The right sidebar contains "INFOS TÂCHE D'IMPRESSION" (Print Job Info) for "InnatePigeon", showing resin type "Surgical Guide V1", layer thickness "0,100 mm", and parameters "Default". It also lists "DÉTAILS" (Details) such as "Temps d'impression" (3 h 14 min), "Couches" (415), and "Volume" (31,07 ml). Under "IMPRIMABILITÉ" (Printability), it shows "Imprimabilité" (confirmed), "Afficher les minima" (checked), and "Afficher les cavités" (checked). A "LISTE DES MODÈLES (1)" (Model List) shows "pac" selected. A small notification window in the bottom right corner repeats the success message: "Tâche chargée avec succès" and "L'impression est en attente dans la file d'impression." (The print is waiting in the queue).

# Lancer l'impression sur l'écran de l'imprimante

# Suivre les instructions...

# Impression en cours

Mettre des gants, ouvrir le capot, déverrouiller le loquet et récupérer la plate-forme pour le rinçage

## Indiquer si l'impression est correcte

- Refermer le bouchon du réservoir de résine
- Placer une plateforme propre dans l'imprimante
- Fermer le capot
